**Our training courses are given in english.**

**Registration is subject to availability (14 participants).**

We are pleased to invite you to a new interactive course concept:  
**How can you master the indications and surgical techniques for treating flatfoot?**

## **PROGRAM**

We have designed a tailor-made course in two phases:

- Sequence 1: A face-to-face academic course to validate theoretical knowledges and discuss clinical cases provided by experts and participants
- Sequence 2: A hands-on, in-person course based on ADDIDREAM dry bones from real cases, anatomical specimens and interactive videos

**You will have the opportunity to work on pathological models. All the surgical equipment (screws, osteosynthesis plates, drills) will be available, enhancing this realistic and personalized experience to improve your skills.**

It will be a unique opportunity to share experiences and daily challenges.

Option: it will be possible to work on your own patient case by transforming your CT Scan into a 3D bone model and discuss strategy with the experts during the practical session. This option has an additional cost of €250.

Topics covered:

- Medial displacement calcaneus osteotomy
- Lengthening calcaneus osteotomies (Evans/Hintermann)
- Arthroreisis or endoprosthesis of the tarsal sinus
- Cotton osteotomy
- Lapidus arthrodesis
- Double hindfoot arthrodesis
- Flexor digitorum longus transfer
- Spring ligament repair
